

June 2011

*1. Please could you tell me what is your trust's current clinical procedure in terms of how many consecutive miscarriages a woman has to have had, before further medical tests are undertaken to establish any underlying medical causes for the miscarriages.*

Overall it is three or more consecutive miscarriages, ideally with the same partner. However, we are flexible and see women once they had their 3rd consecutive miscarriage.

*2. Please can you also tell me how many miscarriages occurred within the trust in the years 2009 and 2010?*

2009 = 524 miscarriages

2010 = 602 miscarriages
