

October 2011

*1. The number of hospital referrals made by GPs for Electrocardiogram (ECG) tests?*

Referrals to the Trust by GPs for Electrocardiogram (ECG) tests would only occur if the GPs' machines were out of action (ie broken). These tests are therefore carried out on an ad-hoc basis and we do not collect or hold data for the occasions when this has happened.

*2. How many of those resulted in no further tests or treatment?*

Please see our response to question 1 above.
