

What is Locum's Nest and how will it benefit me?

01_ What is Locum's Nest and why is it being introduced at South and Mid Essex University Hospitals Group?

Locum's Nest is the app that makes it easier for Doctors to find, book and receive payment for Bank shifts.

Founded by doctors, Locum's Nest uses advanced technology to deliver a smarter and more efficient way of managing Bank shifts. No longer is there a need to call, email or text to view and book a Bank shift, and paper timesheets are a thing of times gone past.

Locum's Nest replaces all of these things and more, by automating the Bank process from start to finish, helping the Trusts better staff their wards and save money on agency costs.

02_ How do I register onto the app?

All you need to do is to download the free app from the Android Store or the Apple App Store and put your GMC number, first name and last name.

The app will then recognise you as affiliated with the Trusts and once you complete a simple ID verification process you are free to apply and book shifts.

03_ How do I get paid?

Once the day of your shift comes, all you need to do is issue an electronic timesheet from your app. This will then be passed through a series of approval steps by the hospital and you will be paid through the normal payroll cycle.

What's really great about this process is that it allows you to track the journey of your timesheet through the hospital, just like your parcels

04_ Do I need to upload any documents onto my digital passport?

As a doctor affiliated with the Trusts you do not need to upload any documents, unless you wish to.

The app links with the hospitals' HR department and is able to recognise that you're cleared to work with us.

The Digital Passport is used more by doctors wishing to join our bank

The more you use the app the more your profile gets enriched.
