

March 2012

*1. Under the terms of the Freedom of Information Act I would like to request figures for the number of people treated at Southend Hospital for Guillain Barre syndrome over each of the last two years.*

There were 15 patients during 2010/11 who were diagnosed and treated for Guillain Barre Syndrome.

There were 10 patients during 2011/12 (April 2011 – February 2012) who were diagnosed and treated for Guillain Barre Syndrome.

*2. Could I also find out how many of them survived and were discharged and how many died from the syndrome?*

Of the 25 patients, all were discharged and no deaths were recorded.
