

June 2012

1. On April 1st 2012 how many adult patients in your region/hospital received renal replacement therapy (RRT) as described in the following table:

Description	Number of patients at 1/4/12
Hospital dialysis	
<i>Hospital Haemodialysis/Filtration with access via haemodialysis catheter 19 years and over</i>	24
<i>Hospital Haemodialysis/Filtration with access via arteriovenous fistula or graft 19 years and over</i>	92
<i>Hospital Haemodialysis/Filtration with access via haemodialysis catheter with blood borne virus 19 years and over</i>	<5
<i>Hospital Haemodialysis/Filtration with access via arteriovenous fistula or graft with blood borne virus 19 years and over</i>	0
Satellite dialysis	
<i>Satellite Haemodialysis/Filtration with access via haemodialysis catheter 19 years and over</i>	No Satellite unit
<i>Satellite Haemodialysis/Filtration with access via arteriovenous fistula or graft 19 years and over</i>	“
<i>Satellite Haemodialysis/Filtration with access via haemodialysis catheter with blood borne virus 19 years and over</i>	“
<i>Satellite Haemodialysis/Filtration with access via arteriovenous fistula or graft with blood borne virus 19 years and over</i>	“
Home dialysis	
<i>Home Haemodialysis/Filtration with access via haemodialysis catheter 19 years and over</i>	0
<i>Home Haemodialysis/Filtration with access via arteriovenous fistula or graft 19 years and over</i>	<5
Peritoneal Dialysis	
<i>Continuous Ambulatory Peritoneal Dialysis 19 years and over</i>	<5
<i>Automated Peritoneal Dialysis 19 years and over</i>	19
<i>Assisted Automated Peritoneal Dialysis 19 years and over</i>	0

We are unable to provide details which may lead to the identification of the individuals concerned. Accordingly, our response to some of the questions above has therefore been < 5 patients have received such dialysis treatment.

2. *How many new adult patients started RRT in the last financial year 2011/2012?*

The Trust does not collate data by financial year but we do collate data by calendar year. Therefore, for the calendar year 2011 there were 30 patients who started RRT.

3. *How many of these adult incident patients started RRT with a transplant (pre-emptive transplant) as described in the following Health Resource Group codes from the National Tariff?*

Description	Number of Patients
<i>Kidney Transplant from Cadaver non-heart beating donor 19 years and over</i>	0
<i>Kidney Transplant from Cadaver heart beating donor 19 years and over</i>	<5

We are unable to provide details which may lead to the identification of the individuals concerned. Accordingly, our response to one of the questions above has therefore been < 5 patients have received a kidney transplant from Cadaver heart beating donor 19 years and over.
